

Electricians with a **quality** of workmanship, attention to **detail**, and overall **enthusiasm** like no other.

ABOUT

SERVICES

LMS Electrical Contractors has an interesting team and an interesting start. Luke Spolander, owner and founder, started the company whilst working full time. He would work on LMS Electrical Contractors over weekends and built the business up through blatant entrepreneurial tenacity.

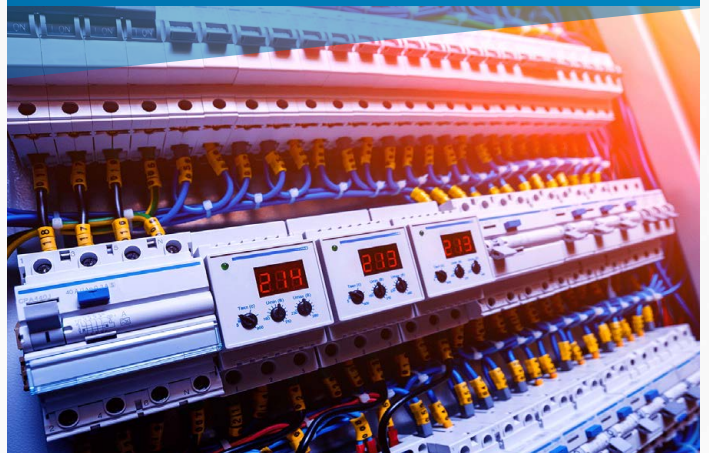

Spolander officially started working solely on the business in February 2017, and showing his dedication to providing superior customer service, he has grown the business to a company able to assist clients on large or small jobs. With two teams on the road all day, every day, customers are guaranteed smooth and efficient service.

The quality of workmanship, attention to detail, and overall enthusiasm for every job speaks volumes and reveals the ethos behind LMS Electrical Contractors.

In addition to many hours spent on site, LMS Electrical Contractors has a network of equally qualified specialists. Whether it's building, plumbing, bathroom design or gate motors, LMS Electrical Contractors can source those professions.

One of the most dangerous elements to manage is electricity – it is essentially controlled lightning, so the need for a qualified and experience electrician is evident. The last thing, as a home or business owner you want is for your wiring to short during a party or business meeting, or even worse someone being electrocuted.

LMS Electrical Contractors offers all electrical services needed to ensure no disaster strikes, because it's a myth that lightning doesn't strike in the same place twice - it's best to ensure your controlled lightning is perfectly managed.

Services

LMS Electrical Contractors are truly focused on providing the best to our clients.

NEW INSTALLATIONS

Whether you are installing a plug point, a new fitting or just replacing your old electrics to new, LMS Electrical Contractors are there to assist you.

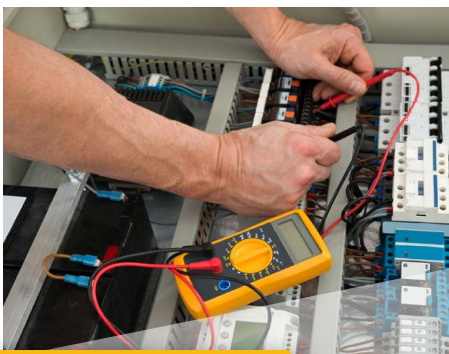

CONSTRUCTION

Whether you are building an extension, adding a plug or light point, or building a new house or factory, LMS Electrical Contractors are there to support you the the entire process.

MAINTENANCE

If your property is 10 years or 10 minutes old, there will come a time when you need some maintenance done. LMS Electrical Contractors can come in and give you a full analytical breakdown of all the electrics on your property.

FAULT FINDING

Electricity is a tricky element, and fault finding can be one of the easiest or most difficult things in the electrical industry. LMS Electrical are specialists in this field.

HOME AUTOMATION

Very new age, but home automation is becoming the new norm. Operating your kitchen lights from your tablet or cell phone has become a reality.

CERTIFICATES OF COMPLIANCE

Did you know that you need to have a certificate of compliance (COC) done on a sale of a house or when an alteration or renovation is done? COC's are only valid for 2 years.
